

Content Filtering Update

The district maintains a web content filter on Chromebooks for the purpose of restricting student access to inappropriate online content. While the district utilizes best practices from the filter vendor who continually updates and categorizes web content, please know, no filter can be 100% and care should always be used when online.

With the latest version of the filter, the district can offer families greater control over their student's device outside of school hours via GoGuardian Parent.

What is GoGuardian Parent?

GoGuardian Parent is an App that runs on your phone to give families greater control over school-issued devices during out-of-school hours.

What's the intention of the App?

GoGuardian Parent allows families to:

- Block websites on school-issued devices during out-of-school hours
- Pause internet access on school-issued devices during out-of-school hours, either on-demand or at a scheduled time

While not available at this time, we hope in the future to be able to provide families with insight to their child's out-of- school hours browsing history, via the App.

When will this be available?

You will be able to login and begin using the Go Guardian Parent App on ***Friday, May 15th at 3pm.***

I have students in other grades, will I be able to use GoGuardian Parent with them?

Yes, this feature will be rolled-out for all students over the next several weeks.

What are "out-of-school hours"?

Currently, out-of-school hours are 3:00pm to 6:30am the following day Monday through Friday and all day Saturday and Sunday.

To get started with GoGuardian Parent, please see the information linked below.
